

Bulk material handling solutions from Baldwin

Consult · Design · Build · Install · Commission · Support

Dry Ingredients

- > Bulk Storage Silos
- > Conveying lines
- > Weigher & batch system

Specialist solutions for the handling of dry bulk materials. Baldwin have an enviable track record with some of the biggest names in the food industry that require the safe and reliable storage and distribution of dry ingredients for their manufacturing processes. From new plant to replacement/refurbishing of existing installations, Baldwin engineers can design and build systems to meet the customers specifications.

Wet Ingredients & Depositing

- > Injection & Depositing
- > Temperature Controlled
- > Pumping Systems

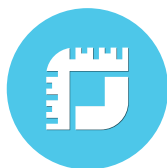

Baldwin have our own range of injection and depositing systems using highly accurate peristaltic and displacement pumps/depositors. We can provide bespoke turnkey temperature controlled bulk liquid handling storage and delivery systems. Our wet ingredient solutions keeps your production line flowing smoothly, from storage and filtration to application and depositing.

Pick & Place Robotics - Automated Systems

- > Product & material handling
- > Pick & Place
- > Conveyors
- > Monitoring

Consistent and efficient, our Robotic pick & Place solutions will bring massive efficiencies and cost savings to your production. From picking, moving, stacking, and monitoring, our systems will fully integrate into your production line.

Service & calibration works

- > Silos
- > Conveying lines
- > Weigher and batch system

Our specialist team of Engineers, are trained and competent in Bulk dry handling systems and offer servicing and annual servicing contracts. This includes a full calibration service for BRC compliance and certification.
