1 - 4 November • New Delhi
Forging Partnerships for Growth

Ambitious UK corporates want to do business beyond their traditional markets.

At Santander we focus on helping businesses prosper by being the “accelerator for international growth”. Our teams help companies develop local connectivity in international markets, thereby supporting their quest to grow beyond the UK.

World Food India 2019 – New Delhi

World Food India is a four-day event in New Delhi focusing on transforming the food economy. There will be exhibitions, seminars and B2B meetings, all bringing together the largest gathering of manufacturers, producers, food processors, policy makers and organisations from the global food ecosystem.

This will present immense opportunities for UK companies involved in food manufacturing, food brands and the supply chain around the food economy, including; packaging, refrigeration, cold chain, processing, food machinery and food services.

Join Santander on a Trade Mission to World Food India 2019

Santander has developed a strong network of partners in India focussing on the food manufacturing and processing sector. By bringing together the knowledge of our country, sector, trade and supply chain finance specialists, we can support our customers with a bespoke set of B2B engagements on Trade Missions like this.
